Experience

Neuralize *Vadodara,Gujarat,India*
Coordinator *February 2024–Present*

- Neuralize is an AI/ML based club which empowers students to explore and master the realms of Python, AI/ML

Education

Bachelor of Engineering (Computer Science & Engineering) *July 2022 - May 2026*
GPA: 8.2/10.0
The Maharaja Sayajirao University of Baroda, Vadodara, Gujarat, India

Higher Secondary Education *May 2020 - April 2022*
Percentage: 88/100 %
Parth Institute, Vadodara, Gujarat, India

Secondary Education *May 2018 - April 2020*
Percentage: 89/100 %
Ambe Vidyalaya, Vadodara, Gujarat, India

Certification

- Data Structures and Algorithms - GeeksForGeeks, 10th Feb, 2024
- Full Stack Development with React & Node JS - GeeksForGeeks, 10th March, 2024
- Odoo combat (Hackathon), 2024 - Certification of Participation
- FP Hackathon (Web development), 2024 - Certification of Participation
- CreaTech (Larsen & Toubro) (Hackathon), 2025 - Certification of Participation
- Daiict Hackathon, 2024 - Certification of Participation

Skills

- **Developer Tools :** Git, Github, VS Code, Jupyter Notebook
- **Other Skills :** Data Structures and Algorithms, Object Oriented Programming (OOP), Operating Systems, Computer Networks, Database Management System
- **Libraries/ Languages :** React, Redux, HTML, CSS, JavaScript, Node.js, MongoDB, SQL, C++, Java, JavaScript, Python
- **Frameworks :** Flask, Express.js, Tailwind CSS

Key Achievements

- **Qualified for SIH 2024** - Ranked 1st place among 20 teams in the college-level internal hackathon, qualifying for Smart India Hackathon 2024 with JobMate, an AI-driven job platform.
- **Teamwork** - Collaborated with teams of 3-4 members on multiple projects, showcasing strong coordination, teamwork, and project management skills to successfully meet deadlines.
- **Qualified for Odoo Finals** - Ranked in the top 150 out of 800 teams in the Odoo Hackathon Finals, developing an E-Library Management System with advanced features.
- **Treasure Hunt Event** - Ranked 1st place among 50 teams in "Lost", a competitive treasure hunt event, demonstrating strong problem-solving, analytical thinking, and teamwork skills.
- **Developed multiple web applications** - Developed full-stack MERN applications, integrating secure authentication, API development, and database management.

Projects

Neuralize - MERN stack, Tailwind CSS
- Designed, developed, and deployed the backend for Neuralize, an AI-focused club at MSU, Vadodara.
- Ensured scalability, security, and seamless API integrations for efficient system performance.
- Optimized backend performance by storing images on Firebase.
- A platform used by 70+ users, showing accessibility and efficiency.
- Implemented secure authentication and data management to enhance user experience and reliability using sessions.
- Automated backend maintenance by scheduling a cron job, reducing initial request time and improving responsiveness, saving time for users/admins.

Process Scheduling Simulation - React.js
- Developed a real-time process scheduling simulation model to visualize and analyze scheduling algorithms for educational and research purposes.
- Simulated process execution in real-time computing systems, enhancing understanding of scheduling techniques.
- Designed a visualization tool to help students analyze and compare different scheduling algorithms.

AI based job mate - MERN, Python, Flask, NumPy, Jupyter Notebook, Tailwind CSS
- Developed an AI-powered resume-building platform enabling users to create professional resumes and apply to companies seamlessly.
- Increased user engagement through UI/UX improvements.
- Implemented AI-driven ranking for recruiters, assessing and prioritizing applications based on relevance and qualifications.
- Integrated AI-based mock interviews, generating tailored questions from resume data for personalized interview practice.
- Designed an intelligent resume extraction system, parsing and analyzing user-provided information for enhanced accuracy.
- Utilized machine learning techniques to optimize application ranking and interview question generation.
- Ensured a seamless user experience with an intuitive interface and automated application tracking.

Event Toolkit - MERN
- Developed a comprehensive event toolkit enabling users and vendors to seamlessly organize and manage events featuring scheduling, booking, packages and communication tools.
- Integrated scheduling, booking, and package management to streamline event planning.
- Implemented cart functionality for customized event service selection and checkout.
- Integrated an AI-powered chatbot to assist users with event planning, queries, and recommendations.

Pet Boarding for Odoo - MERN
- Designed and implemented a pet boarding management system, enhancing operational efficiency.
- Streamlined bookings, scheduling, and customer interactions for seamless management.
- Integrated automation features to optimize pet accommodation and service tracking.
- Developed a user-friendly interface for both customers and administrators.
- Implemented secure data handling for pet records, bookings, and payments.

E-Commerce Website - Firebase, React.js
- Developed a dynamic e-commerce website for FP Hackathon 2024, optimizing user experience and performance.
- Frontend technologies to create an intuitive and responsive UI.
- Integrated Firebase for static data handling, ensuring seamless data retrieval and management.
- Implemented key e-commerce features, including product listings, cart functionality, and checkout.
- Optimized website performance for fast loading and smooth navigation using lazy loading.

E-Library Management for Odoo Finals - MERN
- Developed a comprehensive library management system for the Odoo Finals, optimizing library operations.
- Designed librarian tools for book management, borrowing, returns, and online late fee payments.
- Implemented a user-driven resource-sharing platform, allowing users to post, explore, and access shared materials.
- Enhanced user experience by integrating an advanced search functionality for efficient resource discovery and accessibility.

Footprints'25 Website - React.js
- Website to showcase the ongoing footprints at MSU
- Developed a dynamic website for FootPrints, highlighting past editions and showcasing ongoing events.
- Designed an interactive UI to enhance user engagement and event exploration.
- Integrated multimedia content, including images, videos, and event highlights from previous years.
